PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student with strong problem-solving fundamentals in Data Structures & Algorithms (Java) and active competitive programming practice on LeetCode. Oracle Certified Associate Java Programmer with applied experience translating algorithmic thinking into production systems — including a from-scratch CRDT merge algorithm and multi-tenant distributed backend infrastructure. Comfortable across the full stack, from system design and RESTful API architecture to CI/CD and cloud deployment, with a track record of shipping and maintaining live production applications end-to-end.

EDUCATION

VIT-AP University — **Expected 2027**
B.Tech in Computer Science Engineering — Software Engineering — CGPA: 8.09/10

GITAM Educational Institutions — **2021–2023**
Intermediate — Mathematics, Physics and Chemistry — 928/1000

Narayana English Medium School — **2020–2021**
Secondary School Certificate (SSC) — GPA: 10/10

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript, SQL
DBMS: MySQL, MongoDB

Frontend: React.js, Tailwind CSS, Vite

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication
Operating Systems: Linux OS, Windows
Networking: Computer networks, TCP/IP fundamentals, LAN, Routing
Frameworks & Web: HTML, CSS, Tailwind CSS, React.js, Node.js, Express.js, FastAPI
Databases & Tools: PostgreSQL, Supabase, MongoDB, Redis, Git, GitHub Actions
DevOps & Cloud: Docker, Kubernetes, CI/CD, Vercel, Render, AWS
Linux: Shell scripting, Process management, File permissions
Software Engineering: SDLC, Requirements Engineering, Agile Development, Software Design and Architecture
Core: DSA, Linear Algebra, Engineering Mathematics,

PROJECTS

Taskflow — Task Management Application Live GitHub

React, Express.js, Supabase PostgreSQL, Redis, Razorpay

- Built task-management APIs backed by Supabase PostgreSQL schemas, with authenticated per-user access to task data.
- Implemented Redis caching with time-to-live expiration and cache invalidation to support task retrieval.
- Integrated Razorpay checkout with server-side HMAC-SHA256 signature verification to validate payment authenticity.

ScrapyV1 — E-Commerce Price Tracker Live GitHub

Python, FastAPI, Playwright, BeautifulSoup, MongoDB, Docker, GitHub Actions

- Built a Dockerized price-tracking application with Playwright and BeautifulSoup scraping adapters for e-commerce product data.
- Implemented MongoDB price-history storage and fuzzy product comparisons to track pricing across collected listings.
- Added API controls and scheduled scraping through GitHub Actions; validated functionality with 32 pytest tests and verified persistence of live scrape results.

WatchParty — Real-Time Collaboration Platform Live GitHub

Socket.IO, WebRTC, STUN/TURN, Janus AudioBridge, Chrome Extensions Manifest V3

- Developed Socket.IO rooms and real-time chat with signed guest access, room isolation, and reconnection handling.
- Implemented WebRTC streaming with STUN/TURN configuration and optional Janus AudioBridge integration.
- Built a Manifest V3 browser-extension overlay; added 12 unit/API tests and performed browser checks for camera access and fallback behavior.

CERTIFICATIONS & ACHIEVEMENTS

- **GATE 2026 — Qualified** Scorecard
- **HackerRank — Software Engineer Intern** Certificate

- **AWS Academy — Cloud Architecting** Badge
- **AWS Academy — Cloud Foundations** Badge
- **NPTEL — Linear Algebra for Machine Learning**
- **PW Battlegrounds Participant – Top 30 teams of India 2025**
- **IBM — Advanced GenAI** Certificate
- **NPTEL — User-Centric Computing for HCI**
- **Hackathon Finalist 2025**
- **HackerRank — SQL** Certificate

Languages Spoken: English, Telugu, Hindi
